.

Answer Key:

1. Toolbox Talk | 2. Site Induction | 3. PPE | 4. Hazard | 5. Near-Miss | 6. Method Statement | 7. Risk Assessment | 8. Cordon Off | 9. Permit to Work | 10. Incident Report

SECTION 4 — Scenario Self-Evaluation

Read the scenario below, then answer the questions using vocabulary from this lesson.

Scenario: You are a construction engineer on a UK-managed project site. This morning, you noticed that a section of scaffolding near the east wall appears unstable. A worker walked close to it but was not injured. You need to take action.

Q1. What type of incident occurred near the scaffolding? (Use the correct term.)

Answer: _____

Q2. What should you do to the area around the unstable scaffolding?

Answer: _____

Q3. What document should you complete after this incident?

Answer: _____

Q4. Before any repair work begins on the scaffolding, what two documents are required?

Answer: _____

Q5. If you need to raise this issue at the morning briefing, what type of meeting is that?

Answer: _____

Model Answers: Q1: Near-Miss | Q2: Cordon Off | Q3: Incident Report | Q4: Method Statement + Permit to Work | Q5: Toolbox Talk
